Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I only use it for essential or emergency communication while away from home and no phone is available. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

I am not happy with what this government is doing to us little people. There are too many taxes being levied to those of us who work hard everyday for the money we make. I consider myself a conservative and I am becoming very unhappy with the way the-powers-to-be seem to want to dip into our pockets everytime they need money. This is one more thing that can be added to the trash heap of unfair things happening to us regular citizens. Out-sourcing, illegal aliens, and judicial activism are but a few of the things that I see as going wrong with this country.

Sincerely,

Elgin Dobbins
